

Music Programming Basics - Reference to Finnish National Curriculum of the High Schools (2015)

In Finnish High Schools, students take a minimum of 75 courses during either three or four years. The length of one course is approximately 38 x 45 min. There include both compulsory and elective courses.

Thematic studies

Thematic studies consist of elective cross-disciplinary courses. The learning objectives of Mehackit Atelier meet especially well with a thematic course *Inquiry-based work with technology* (TO2).

- Course *Inquiry-based work with technology* (TO2) (p. 220)
“The aim of the course is to design, implement and present a documented project, thesis, invention or other product individually or in collaboration with other students. At the same time, student develops their ICT-skills. In addition, the goal is to work and collaborate across disciplines. The core content of the course is related to knowledge and skills of two or more different subjects.”

Music

- Course *Communicating with Music* (MU4) (p. 213)
“Student gets to know the practice and potential of music in different art forms, multimedia ICT-environments and in society.”
“It is possible to take the course as an interdisciplinary art project or other multidisciplinary project”
